---

As a full-stack web developer, I have experience with both the client-side and server-side of web applications. I have expertise in using React as a front-end JavaScript library. Additionally, I am familiar with responsive web design practices On the server-side, I have extensive experience with Node.js and Express.js to build scalable and robust server-side applications. I am also skilled in working with MongoDB. As a computer science student, I have a deep understanding of programming concepts and strong problem-solving skills.

## PROJECTS

### Chat Nexus
real time chat website

realtime chat website made with mern stack and only website made with mern stack on github with this many features.

https://chatnexus.tech/

`node js`  `react js`  `mongodb`  `express js`  `socket.io`

### Portfolio website
windows 11 GUI based portfolio website

a unique portfolio website based on the Windows 11 GUI, and uses the same typography, color palette, and layout as the Windows 11 operating system.

https://pradeeps.me/

`reactjs`  `css3`  `redux`

### GPA Calculator
Grade Point Average Calculator Website

made this website to calculate GPA using react js framework/library has 1500+ users and was appreciated by many.

https://gpacalculator.live/

`react js`  `jsx`  `css3`

### typing speed test
website for analysing and testing typing speed

made this typing speed test as already existing websites don't track live typing speed while you type. i added live speed and accuracy analysis as you type.

https://typing-test-9026.netlify.app

`javascript`  `css3`  `html5`
